Investment Philosophy

The Campanile Foundation's endowment is invested with professional money managers. The asset allocation is intended to provide diversification and moderate risk with a focus on long-term investment return. The investment performance, compared to investment return expectations, of each money manager is monitored closely by an independent investment advisor and reviewed quarterly by the Finance and Investment Committee of the Campanile Foundation Board.

The Campanile Foundation's current distribution policy is to provide an annual 4.0% payout of the previous 3 year rolling average of the fund's unitized balance in the endowment pool, for the programs and scholarships of San Diego State University. In the event that the fair market value of an individual true endowment fund, at any one quarter, drops below the permanently restricted amount of the endowment, the distribution rate will not exceed the amount of interest and dividends earned by the endowment in that quarter. The annual distribution rate will be determined each year by the Board of Directors.
