

Investment Philosophy

The Campanile Foundation's endowment is invested with professional money managers. The asset allocation is intended to provide diversification and moderate risk with a focus on long-term investment return. The investment performance, compared to investment return expectations, of each money manager is monitored closely by an independent investment advisor and reviewed quarterly by the Finance and Investment Committee of the Campanile Foundation Board.

The Campanile Foundation's current distribution policy is to provide an annual 4.0% of the three-year moving average of the market value, for the programs and scholarships of San Diego State University. In the event that the fair market value of an individual true endowment fund, at any one quarter, drops below the permanently restricted amount of the endowment, no spending distribution will be made in the following quarter. The annual distribution rate will be determined each year by the Board of Directors.
